

2024 List of Memberships, affiliations, and partnerships

In alignment with our Climate Commitment, all of our engagements with policy makers are in accordance with the goals of the Paris Agreement. Were there to be any instances of non-alignment, the policy or engagement in question would be revised to bring it into alignment. Additionally, the organizations listed below have been reviewed to ensure that their policy engagements and advocacy align with the Paris Agreement (if they conduct climate change engagements and advocacy). If an organization is found to be out of alignment, we would engage in a dialogue to understand their position and explain our own position on climate change. We would then monitor the alignment status of the organization for up to two years. Continued non-alignment could result in further steps being taken, including potentially discontinuing our relationship with the organization.

Co-operative memberships

As a co-operative, we're a part of a global co-operative system, and belong to the following associations, coalitions, and initiatives to advocate for and advance the co-op sector:
